## VISION

We member of Sangguniang Barangay have our vision to implement policies, plans, sports programs, projects and activities in our community that can help the skills and talents of the youth and also can generate employment and livelihood especially for the out of school for the improvement of their standard living. In where all families from the different walks of life can have access to the delivery of basic social, economic an infrastructure services. To have honest, harmonious and transparent barangay governance in order to give efficient and dynamic operating mechanism in the delivery of basic services and peaceful and drug free barangay.

## MISSION

To provide intervention and opportunities that will uplift the living condition of the less fortunate individuals, families, group and communities in particular and in society in general.

**PREPARED BY:** EDWARD NEL MANON, DRAFTSMAN II  
**APPROVED BY:**

**BARANGAY 31**

**Explanation**

The City-scale Liquefaction Hazard Map of Bacolod City was based on geology, presence of active faults, historical accounts of liquefaction, geomorphology and hydrology of the area. Field surveys conducted in 2017 verified outstanding geomorphic features in the field, identifying areas susceptible to liquefaction.

The presence of liquefaction hazard does not restrict construction of any structure and development. However, proper engineering consideration must be taken into account (e.g. strict adherence to the National Building Code of the Philippines.)

PHIVOLCS-DOST takes the necessary steps to continually improve the accuracy of the liquefaction information reflected in this map. The Liquefaction Hazard Map may be revised as new information becomes available.

**Limitations**

1. All hazard zone boundaries are approximate and gradational.
2. This map is semi-detailed and may be used only for land-use, emergency response and mitigation planning. Site specific evaluation is needed for construction of major structures and lifelines.
3. Administrative boundaries are approximate.
4. Coastal boundaries of the hazard are based on the latest location of the coast as shown in the most recent Google Satellite Imagery (2013-2017) available or IF SAR Digital Terrain Model. The boundaries may change through time, as coasts are continuously subjected to processes that may contribute to their erosion or aggradation.

**Data Sources**

1. Base maps are National Mapping and Resource Information Authority (NAMRIA) 1:50,000 topographic maps, 1993 and IF SAR Digital Terrain Model, 2013.
2. Administrative boundaries are adopted from Philippine GIS data, 2011.
